

To save time searching for items on the internet, simply type a word or phrase into the "ADDRESS" bar of Explorer.

Click GO (or press enter) and the search will be conducted at the default search engine specified in OPTIONS.

To customize the default search engine and methods,

Click TOOLS,

Click INTERNET OPTIONS

Go to the ADVANCED tab and set the features to your desired settings.

*You can also click the SEARCH button in the button bar and click CUSTOMIZE to specify your preferred search service, and specify different services for different items (email address, map, web site, etc).*
